

## One Man Lifts 75 tons—easily!

*Tremendous Hydraulic Power and  
laborless strokes of the handle  
do the work*

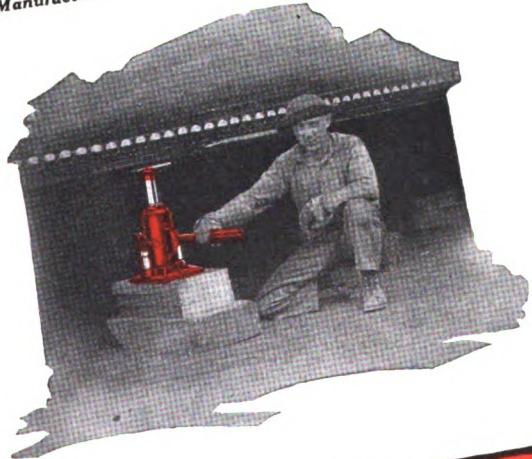

WHEN vast tonnage needs raising, lowering or pushing a few thousandths of an inch or a foot or more, Blackhawk and one man will do the job quickly—and with perfect safety.

Easy strokes of the handle exert tremendous hydraulic oil power. To lower, just turn the release valve with the handle tip—and down comes the load at controlled speed to any desired point, in perfect safety. No pumping—no labor—no danger. One man carries and operates jack.

In industrial plants of wide and varied natures throughout the country, Blackhawk Jacks are multiplying man-power and saving time and money. And they can do the same for you.

Why not ask us for catalog and how Blackhawk Jacks can be of invaluable service to you? We make a complete line of Blackhawk Jacks to fill industrial needs— $1\frac{1}{2}$  to 75 tons capacity.

**BLACKHAWK MFG. COMPANY**  
Dept. EN Milwaukee, Wisconsin  
*Manufacturers of Socket Wrenches and Hydraulic Jacks*

## BLACKHAWK "HEAVI-LIFT"

—made in sizes that handle from 12 to 75 tons. Larger models have 2 pumps—low-pressure pump to raise plunger and high-pressure pump to raise load.
